The Journal of Current Laser Abstracts is a monthly reference journal devoted to the comprehensive coverage of the world's open literature on laser theory, design and application. More than one thousand source publications are continually reviewed and include periodicals, journals, patent gazettes, transaction proceedings, government and company publications, and books. Subject classifications include all aspects of lasers and laser technology and diverse applications such as guidance, holography, display, geodesy, medicine, dentistry and ophthalmology. To make pertinent references easier to find, an indexing system of over one hundred topics allows the subscriber to retrieve information in a fraction of the time which would be required for a manual search.

The JOURNAL OF CURRENT LASER ABSTRACTS is published monthly by the Institute for Laser Documentation, P.O. Box 2070, Rolling Hills, California, 90274. Annual Subscription rate $225; foreign air mail delivery available at $20; domestic first class mail delivery available at $15.
